

THIS IS THE ONE EVERYONE'S TALKING ABOUT!

GET SERIOUS![®]

STAIN, ODOR & 'PHEROMONE FACTOR' EXTRACTOR

'SERIOUS' STUBBORN STAINS?

This is the stain remover you can warm up to quickly soften & wipe off old, "locked-on" stains! Simply warm bottle in a microwave & re-apply!

'YELLOWING' & ODORS GONE!

The only one that never 'yellows' carpet & removes 'yellow' left behind by other cleaners! GET SERIOUS![®] doesn't leave any 'neutralized' urine under padding to wick-up to the top of carpet later and cause 'yellowing' like most enzymatic cleaners... **GS!**[®] penetrates to the padding and bubbles **↑UP↑** stains & odors to the top of the carpet where they can be **completely blotted out** with a dry terry towel. *Quick & easy!*

STOPS the RE-SOILING CYCLE!

The only cleaner that extracts the pheromone, too, so pets aren't attracted back to the mark. Their scent ("pheromone") is in the urine which is totally extracted during the cleaning process!

NOTE:

A PHEROMONE CANNOT BE "NEUTRALIZED" WITH ENZYMATICS! IT MUST THEREFORE BE REMOVED ("EXTRACTED") SO IT DOES NOT CONFUSE OUR PETS AND ATTRACT THEM BACK TO RE-SOIL.

ENZYME-FREE & WORKS IMMEDIATELY!

No need for heavy saturation like most enzyme-based cleaners that can lead to the growth of allergy-causing molds from under the padding, resulting in mold spore release into the air.

1 BOTTLE OF GET SERIOUS![®] HANDLES AS MANY STAINS & ODORS AS 2 BOTTLES OF AN ENZYME CLEANER!

Buying 1 bottle of GET SERIOUS![®] is like getting 2 bottles of the competition! That's a great \$avings!

Seeing "double"?

GS![®] cleans **twice** the amount of other cleaners -because you only need to use half as much!

TAKES LESS THAN 3 MINUTES!

REMOVES STAINS, ODORS & THE "PHEROMONE FACTOR" TOO!

STOPS the RE-SOILING CYCLE!

APPLY - WORK IN - BLOT OUT & YOU'RE ALL DONE!

NO WAITING!

Here's why GET SERIOUS![®] really works when others fail:

GET SERIOUS![®] "extracts the problem", it doesn't merely neutralize it and leave it in the carpet like with enzymatics. **GS!**[®] penetrates through the padding all the way to the subfloor & "bubbles **↑up↑**" the problem (ie urine) to the top of the carpet where you can **completely blot it out**. Any dry terrycloth towel blots like a magnet with this revolutionary solution, pulling the amazing bubbles up from under the padding. These magic bubbles 'attach to' the stain or odor "source" and then 'carry it' **↑up↑** to the surface where it can be completely absorbed into the towel during the blotting process and is **totally extracted**. So, no odor and no 'yellowing' can occur later, -It's all gone! **Pets aren't attracted back to re-soil**, the pheromone is gone! Safe, non-toxic, biodegradable & non-flammable.
