

VAN CHARLES LABORATORIES, inc.

Don't blame me!
All you need to do
is use GS!

GET SERIOUS! PHEROMONE, ODOR & STAIN EXTRACTOR FOR CARPETS & UPHOLSTERY

QUICK & EASY TO USE!

Squirt On, Work In, Blot Dry – YOU'RE DONE in 3 MINUTES!

STOPS THE RE-SOILING CYCLE!

Pets aren't attracted back to re-soil because their 'pheromone' (the attractant) is extracted too!

NEVER LEAVES CARPET YELLOW!

And removes 'old yellowing' left behind by other cleaners!

NO ENZYMES, MOLD OR ALLERGIES!

Works faster than enzymes & doesn't contain any "live" proteins!

Got A SERIOUS STAIN ?

MICROWAVE-TOUGH STAINS AWAY!

Because "GET SERIOUS!" does not contain any live enzymes you can warm it in your microwave to strengthen its STAIN removing power. You can heat the product in its very own bottle, then apply the warmed "GET SERIOUS!" on the STAIN, brush it in and just blot it out with a dry terry towel. Then toss the towel in your next washload & you're done.

NOTE: This heated process is only necessary as a 2nd application, and only if the first, 'unheated' application has dried & a STAIN is still visible. You can re-warm "GET SERIOUS!" as often as needed without harming the formula. READ BOTTLE DIRECTIONS.

I call it the
"SMARTER
Solution!"

OPEN CAP BEFORE HEATING

\$\$\$ PLUS \$\$\$
= 2 of the competition!

GET SERIOUS! -The One Everyone's Talking About!
